- **Rodent life catch trap**
- **Rodent accessories**
**RODEX RODENT BAIT RANGE**

**Description:** The RODEX range of rodent bait is a highly active and palatable anti-coagulant rodenticide for the control of rats and mice.

**Active ingredient:** Brodifacoum 0,05 g / kg

**Controls:** Norway rat, root rat and house mice

**Advantages:** Single feed * Potent knock down * Low feeding requirements * Secondary poisoning highly unlikely * Highly palatable for rats and mice * Contains Bitrax repellent for humans

**Products:**

- **RODEX BAIT BLOCKS:** (L.6965)
  Pack sizes: 100gr, 500gr, 3kg, 10kg.
  Block size: 5g blocks. Blocks contains grain and vanilla.

- **RODEX GRAIN BAIT:** (L.6966)
  Pack sizes: 100gr, 500gr, 3kg, 10kg. Contains 8 different types of grain.

- **RODEX PELLETS:** (L.6969)
  Pack sizes: 100gr, 500gr, 3kg, 10kg
  Norway and roof rat 50– 75gr per bait station.
  House mouse: 15 - 20 gr bait station

- **RODEX LIQUID BAIT:** (L.6967)
  Pack sizes: 500ml, 1 litre. Application: Mix 1 part liquid bait with 15 part water. Place in drinking stations.

- **RODEX LIQUID CONCENTRATE:** (L.6968)
  Pack sizes: 500ml, 1 litre * Application: Manufacture Liquid bait: Mix 1 part Rodex LB with 160 parts water, place in liquid dispensers. **Manufacture of solid baits.** Mix 8ml Rodex LB with 12ml water. Mix mixture with cereal type carriers, such as grain. Place 30-50gr of bait in each bait station.
Rodent control

Rodent baits

○ STOP KILL RODENT BLOCKS

Description: STOP KILL RODENT BLOCK bait is a highly active and palatable anti-coagulant rodenticide for the control of rats and mice.

Active ingredient: Brodifacoum 0,05 g / kg

Controls: Norway rat, root rat and house mice

Pack sizes: 3kg.

Block size: 10g blocks.

○ TOMCAT RODENT BLOCKS (L.5524)

Contains: Bromadiolone 0,05g/kg

Block sizes: 15g and 28g blocks

Pack sizes: 8kg, 224g

○ STORM RODENT BAIT (L.5524/ N-AR 0875)

Contains: Flocoumafen 50mg/kg

Block sizes: 10g

Pack sizes: 3kg
**Rodent control**

**Rodent baits**

**Multi-feed with very low secondary poisoning**

**RIDAK BAIT RANGE** (L.5524/ N-AR 0875)

*RIDAK BAIT BLOCKS* (L.8641)

**Active ingredient:** Difenacoum 0,005 g / kg

**Advantages:**
- Multifeed feed *
- Very low secondary poisoning *
- Highly palatable for rats and mice *
- Weather proof

**Application:**
- Norway and roof rat 50–75gr per bait station.
- House mouse: 15 - 20 gr bait station

**Pack sizes:** 3kg, 10kg.

**Block size:** 5g blocks.

*RIDAK PASTE* (L.8642)

**Active ingredient:** Difenacoum 0,005 g / kg

**Advantages:**
- Multifeed feed *
- Very low secondary poisoning *
- Highly palatable for rats and mice *
- Weather proof.

**Application:**
- Norway and roof rat 50–75gr per bait station.
- House mouse: 15 - 20 gr bait station

**Pack sizes:** 5kg

**Sachet size:** 5g blocks.

*RIDAK GOLD GRAIN* (L.8809)

**Active ingredient:** Difenacoum 0,005 g / kg

**Pack sizes:** 20kg, 3kg

**Advantages:**
- RIDAK™ GOLD innovative new bait technology improves rat and mouse attraction and control.
- FORTEC™ technology makes use of foraging rodents natural attraction to food source with a variety. Grain pellets of a clearly different size, colour, shape, texture, smell and taste encouraging rodents to feed for longer.
- Different looks, feels, tastes and smells, maximise the speed with which a lethal dose of rodenticide is consumed.
- Palatability four times the level of a standard wheat bait with rats, and almost double its level with mice.
- Durable and suitable for use in damp conditions.

**Application rate:**
- 200g bait in bait station every 10 to 20 meter.

Rodent control

Rodent bait stations

Quality tamper-resistant bait stations keep bait away from children, pets and non-target animals. They also keep bait fresher for longer by protecting it from dust, dirt, moisture and other contaminants. Unique key to open.

- PETI MOUSE
- ALPHA
- BETA
- NEPTUNE
- TOMCAT LOW PROVILE
- DRINKING STATION
- TRAPPER PEST MONITOR
- CARTON BAIT BOX

Rodent snap trap

- SNAP TRAP
  - Sensitive trigger
  - Powerful snap
Glue board traps

Non toxic pre-baited boards attracts rodents and catches them by surprise. Recovers carcases of dead pests and animals for hygienic pest management.

**DOUBLE JEOPARDY MOUSE GLUE BOARD TRAP**

Non-toxic non-drying pre-baited carton glue board trap attracts mice, cockroaches, ants and catches them by surprise.

- Powerful non drying adhesive on disposable carton board.
- Highly attractive non toxic bait.
- Recovers carcases of target pests.
- Available in packs of 72.
- Each board can split in two for versatile application.
- Printed warnings and instructions.

**STICK-EM RAT GLUE BOARD TRAP**

Non-toxic, non-drying, pre-baited plastic tray glue board trap, attracts and catches rats.

- Powerful non-drying adhesive in shallow plastic tray.
- Highly attractive bait system.
- Non-toxic rodent control for sensitive areas.
- Recovers carcases of target pests.
- Low profile for placement in-and-under difficult to reach areas.
- Place along side walls or in areas with previous visit evidence.
- Available in packs of 6 sets.
Rodent control

Life catch rodent trap

Catch and release or dispose humanely. Use attractants.

- Re-usable multiple-catch mouse trap
- Made from strong durable material.
- Add any attractant in trap to lure.
- Non-toxic rodent control for sensitive environments.
- Efficient one way door system ensures reliable catch rate.
- Inspection window allows for monitoring without opening the trap.
- Place against walls or previously infested areas.
- Can incorporate glue board trap.
- Easy-to-clean system.

**REPEATER**

- Larger trap catches up to 6 mice at a time.
- Can incorporate glue board trap.
- 12 per case.

**LITTLE PETE**

- Catches up to 3 mice at a time.
- Small design fits in tight spots.
- 12 per case.

**HENCHEM RATE CAGE TRAP**

- Electroplated stainless steel cage.
- Live catch trap.
- Humane poison free rodent control.
- Sturdy epoxy coated design.
- Strong spring loaded flap door.
- Sensitive trigger mechanism.
- Pre-bait trap with any attractive food source.
- Dimensions: 35cm(L) x 19cm(W) x 14cm(H)
There are six major problems caused by rats and mice:

1. They eat food and contaminate it with urine and excrement.
2. They gnaw into materials such as paper, books, wood or upholstery which they use as nest material. They also gnaw plastic, cinder blocks, soft metals such as lead and aluminium, and wiring which may cause a fire hazard.
3. Rats occasionally bite people and may kill small animals.
4. They, or the parasites they carry, (such as fleas, mites and worms) spread many diseases.
5. Rats can damage ornamental plants by burrowing among the roots, or feeding on new growth or twigs. They also eat some garden vegetables, such as corn and squash.
6. Rats and mice are socially unacceptable. These rodents have been a problem for centuries, mainly because they have an incredible ability to survive and are so difficult to eliminate. In addition, they are extremely compatible with human behaviour and needs.
Identification of rodents

NORWAY RAT
- Droppings
- Avg length ¾”
- Front foot: 4 toes
- Rat tracks

ROOF RAT
- Droppings
- Avg length ½”
- Hind feet: 5 toes

HOUSE MOUSE
- Droppings
- Avg length 1/4”
- Mouse tracks
