Insecticidal and fungicidal surface treatment for seasoned timber

L7445

*Ready to use, long term control*  
*Powerful penetration*

A ready-to-use organic solvent-based solution containing specifically blended insecticidal and fungicidal active ingredients that provides a colourless surface treatment for protection of seasoned timber against wood borer and termite attack as well as discolouring fungi and mould growth

### **Benefits:**

- Contains a high level of insecticide to provide long term protection
- Controls and eradicates wood boring insects in infested timber.
- The organic solvent provides a degree of penetration of the active ingredients into the wood structure and ensures rapid drying
- After drying, any coating/finish can be applied on the treated wood surface.

### **Contains:**

- Cypermethrin (Synthetic pyrethroid) 10 g/ℓ
- 2 – (thiocyanomethylthio) benzothiazole 8 g/ℓ  
Organosulphur compound)

### **Application rate:**

- 4-8m<sup>2</sup> per liter

### **Important:**

- Apply to clean, dry timber surfaces before applying a final wood coating/finish. Ensure that all surfaces are thoroughly covered by using either brush-on, dip or spray application methods.
- Avoid skin contact.

**Pack:** 1liter, 5liter & 20liter
