

GLYBOR 300

Insecticidal and fungicidal surface treatment for seasoned timber

(L10635)

GlyBor 300 is a ready-for-use, glycol-based wood preserving solution that is formulated as a surface and internal treatment for preserving untreated and difficult to treat timbers, whether new or existing

Advantages:

- A colourless, odourless and non-flammable treatment of wide spectrum fungicidal and insecticidal activity with the exceptional advantage of having a low mammalian toxicity
- It is easy to apply and can be over-coated with any wood sealer/coating after drying.

Contains:

Boric acid equivalent (H_3BO_3) 300 g/ℓ (min.)

Application:

125 to 250 mℓ per m² per coat, depending on the surface smoothness and timber species

Pack Sizes:

1L and 25L
