WARNINGS

- Handle with care.
- Poisonous by swallowing, avoid excessive skin contact and inhalation.
- Poisonous to fish and bees.
- Keep out of reach of children uninformed persons and animals.
- Keep container tightly closed.
- Do not dust directly onto people, pets or food.
- Store away from foodstuff and feed.
- May cause irritation of the skin, eyes, mucous membranes and skin sensitization.

PRECAUTIONS

- Do not use in the presence of persons with known sensitivity to pyrethroids.
- In the case of signs of sensitivity, obtain medical advice.
- Avoid inhalation of dust.
- Avoid contact with eyes and skin.
- Wash hands with soap and water after use.
- Do not eat, drink or smoke while using.
- Cover fish tanks while dusting.
- Keep cats away from treated area for at least one week.
- Avoid contamination of food, feed, water, eating utensils and food preparation surfaces.
- Destroy empty container and dispose of in a safe way.
- Never use the empty container for any other purpose.

PERMADUST is a ready-to-use residual treatment for the control of crawling insects in local authority premises, public health situations and industry, including premises where food is stored, prepared or eaten. It is particularly valuable in situations where water or oil based insecticide formulations cannot be used.

The product may be used in the following situations:

Public Health including households, schools, hostels, hospitals, hotels, disinfestations clinics.

Food Handling and Storage including kitchens, canteens, restaurants, factories and warehouses.

Small Animal Bedding in domestic premises, kennels, pet shops, animal clinics, animal houses.

DIRECTIONS FOR USE

USE ONLY AS DIRECTED.

Cockroaches, Beetles, Silverfish, etc.

Liberally apply a band of powder to the floor along skirting boards, at wall/floor junctions, around cookers, fridges, fireplaces, pipes, rubbish chutes, dustbins, in cupboards and other places that insects are known to run or where they may find harbourage. Blow or sprinkle dust into cracks and crevices. Leave the powder undisturbed for as long as possible.

Ants, Crickets

Sprinkle powder freely along insect runs and around nests. Where ants are invading premises apply liberally to points of access, e.g. doorsteps, window frames, airbricks, cracks and crevices and in electrical junction boxes.

Fleas and Bedbugs

Before applying the powder, ensure that the surfaces are clean and dust free. Vacuuming will remove dust, fluff and debris. If a vacuum cleaner is used ensure small amount of the **PERMADUST** is sucked into the vacuum bag to kill adults and larvae before removing.

Sprinkle powder on floors, carpets, bedsteads, bedsprings, mattresses and upholstered furniture: wait several hours before vacuuming. Pay particular attention to insect harbourages such as cracks, crevices, seams, and folds of fabric.

Small Animal: As an aid to the control of infestations, apply **PERMADUST** to the pets bedding, basket, carpets and furniture used by infested animal. Do not apply directly to animals.

Retreat as necessary.
